State-of-the-art facilities

CREATE CHANGE
Health at UQ

The health industry employs the highest number of people of any industry in Australia. Careers in health continue to evolve with new technologies and discoveries, ensuring there is a constant demand for health graduates.

Important for everybody
As individuals, good health is our greatest asset. As members of a global community, access to the best possible health advice and care is fundamental to our quality of life.

At UQ, we are committed to teaching the healthcare leaders of the future and advance understanding of:
• how to promote and sustain good health
• how to detect, prevent and manage the chronic diseases that cause premature death and disability
• how to build better healthcare services and systems.

This knowledge is coupled with the very best learning methods and support to educate the next generation of leaders in healthcare provision and innovation.

Learning
UQ offers one of the widest ranges of health study areas of any Australian university. Our academic staff include award-winning lecturers who combine teaching with internationally recognised research to create an exceptional learning experience.

Our students undertake clinical or industry placements in a variety of healthcare settings, including major hospitals and UQ’s own dentistry, healthy ageing, nutrition, rehabilitation and psychology clinics, as well as multidisciplinary primary care centres. Placement opportunities are also offered with partner healthcare organisations internationally.

At UQ:
• many of our health educators are leading practitioners who choose to combine teaching with professional practice and important research
• our health educators have received prestigious Australian teaching awards every year for the past 10 years
• many of our researchers have made internationally recognised discoveries in their fields of expertise.

Learn with the best
UQ is praised for its excellence, diversity and inclusivity. You will study alongside Queensland’s top students and other high-achieving students from around Australia and the world. Many UQ graduates go on to become leaders in their field.

Practical experience
We focus on interprofessional education to make our graduates workplace-ready as team members who improve health outcomes. Our students undertake clinical (working with clients) or industry placements with our network of local, national and international hospitals and healthcare partners. These include major hospitals and private practices throughout Queensland, Australia and overseas. You will graduate confident and ready to commence a dynamic career in your chosen field.

At the forefront of discovery
Our researchers translate discovery, innovation and interaction into health and medical care best practices that lead to life-changing benefits for both individuals and whole populations. Our research is intensive, world-leading and covers the full spectrum, from the molecular to the macro, and from the lab bench to the bedside and beyond. UQ sets national benchmarks for integrated health research by investing heavily in health and medical research, and produces graduates who are ready to lead the healthcare of the future.

Excellent job prospects
The health industry employs the highest number of people of any Australian industry.

Global leaders
Our medical graduates are improving the quality of patient care and public health globally.

Top 3 in the world for sports related subjects 2018*

2nd in Asia-Pacific for Social Sciences and Public Health**

Job-ready graduates
Most of our students undertake clinical or industry placements with our network of local, national and international hospitals and healthcare partners.

* QS World University Rankings by Subject 2018
** 2018 US News Best Global Universities Rankings

“I chose to study the Bachelor of Occupational Therapy (Honours) at UQ because it is so versatile with a range of career opportunities. These opportunities include hospital work with a rehabilitation and neurological focus to paediatrics, working in schools and clinics, as well as workplace rehabilitation and mental health. The most valuable experience I had during my studies would be my first placement. I learnt something new every day and was able to work on my clinical skills as a therapist. It really prepared me for my next placement, as well as entering the workforce.”

Lachlan Gooding
Bachelor of Occupational Therapy (Honours) graduate
Practical learning experiences

With the extensive range of clinical and professional placements offered as part of UQ’s health degrees, you have the opportunity to take the theory learnt during your studies and practise it in a real-life setting. Our clinical and professional placements will give you specialised knowledge, understanding and practical skills so you can graduate ready for an exciting career in the health industry.

Placement opportunities
Most of our students undertake either clinical or industry placements in a variety of settings including public and private hospitals, private clinics, professional organisations and community centres. Through our strong relationships with major healthcare and industry partners, including Queensland Health, placements can be undertaken in your local community, in rural and remote areas and, at times, overseas. We have staff in placement units who are dedicated to securing quality, authentic placement opportunities for our students. UQ has partnered with Southern Queensland Rural Health (SQRH), a University Department of Rural Health, which has strong relationships with local health providers to ensure highly innovative and flexible rural clinical placement experiences and delivers enhanced clinical learning opportunities for nursing, midwifery and allied health students. SQRH provides a range of direct supports including accommodation and travel support for clinical placements in rural communities across Southern Queensland. You may be exposed to different placement environments, some of which will be multidisciplinary in nature and promote interprofessional practice where you will collaborate with students from other health programs at UQ. Many of our graduates are successful in finding employment as a result of their placement, with some securing jobs at the same organisation at which they undertook their placement.

UQ Health Clinics
Depending on your program, you may complete placement at one of UQ’s Health Clinics, which provide healthcare and rehabilitation services to the public, and UQ students and staff. Our clinics specialise in:
- audiology (hearing)
- dentistry
- healthy ageing
- nutrition and dietetics
- occupational therapy
- physiotherapy
- psychology
- speech pathology
- telehealth services.

Based at UQ’s St Lucia campus, the UQ Health and Rehabilitation Clinics provide healthcare and rehabilitation to the public through their audiology, occupational therapy, physiotherapy, speech pathology and telehealth services. Our psychology clinic is located at St Lucia, while our nutrition clinics are located in St Lucia and Ipswich. UQ Healthy Living opened in 2018 as an interprofessional clinic promoting healthy ageing and wellbeing in older adults.

International placements
Depending on your program, you can broaden your horizons and learning experiences with international placement opportunities. As well as a chance to travel overseas, these international placements will give you exposure to professional and cultural experiences not commonly found in Australia. UQ’s Faculty of Medicine offers students the opportunity to participate in observatories and electives, at a range of pre-approved locations in Queensland, Ochsner Clinical School in the US and at Queen’s University in Canada. UQ’s Faculty of Health and Behavioural Sciences offers many international placement opportunities across a range of programs. Students can also apply for non-pre-approved locations. There are many other international placement opportunities offered depending on your chosen health degree.

UQ Health Clinics

Interprofessional education
Driving the future of healthcare

The ageing population, rise of chronic disease and complex health conditions are placing great demands not only on Australia’s national health and social care systems, but also on services across the globe. UQ aspires to the World Health Organization’s finding that recognises one way to significantly improve the delivery of healthcare is to educate health professionals on working together to communicate across professional boundaries, and to think and work as a team centred on the client.

This collaborative-based care approach is at the heart of major changes in health education and is paving the way for the future of healthcare.

This means that at UQ, we ensure your education in a health or social care discipline gives you opportunities for interdisciplinary learning, where you not only learn with students from other disciplines but collaborate to find solutions. A UQ education gives you the skills and knowledge to become a change agent in health or social care. UQ is committed to producing practitioners who are future-focused, critical thinkers able to act quickly and effectively when they enter the workplace. You will benefit from learning and collaborating with students from other health disciplines at UQ and participate in team activities and complex case scenarios. You will graduate knowing how to communicate with other health and social care professionals, and understand how these professions can work together to provide effective management plans for individual patients. These innovative teaching and practical interprofessional learning experiences will set you apart from other health graduates and prepare you for a future in a range of clinical and community care situations.

An interactive learning experience that sets you apart
Many of our students undertake the HLTH1000 course in their first year to learn how to navigate the complexity of the health and social care system in Australia and around the world. In HLTH1000, you will join students from other health faculty degrees in an interprofessional course where you will learn about the range of roles and responsibilities within healthcare teams, and the importance of person-centred care. With a range of interactive, online study materials and weekly interprofessional workshops, you will gain the understanding and practical skills for working alongside other health and social care professionals.

Our focus is to make you not only individually competent, but also collectively competent. We will equip you with the theoretical knowledge, practical skills and understanding to work with and alongside all health professions to achieve the best outcomes for each individual patient. Throughout your degree, you will also have other opportunities to build upon your interprofessional education via unique learning experiences including interprofessional practical opportunities.

“In a standard day as a pharmacist, I work with an extensive team. I work with our patients to ensure their understanding and safe use of their medications. I assist my fellow pharmacy team to interpret and evaluate therapeutic appropriateness, and to provide timely access to medications. I regularly collaborate with doctors to clarify, optimise and discuss our patients’ medication regimens. I field phone queries from hospitals, nursing homes, patients and carers. I refer patients to physiotherapists, occupational therapists, podiatrists and other allied health professionals. Our team spans professions, so that through a collective approach, we can help every patient to achieve the best health outcomes possible.”

Kaela Armitage
Bachelor of Pharmacy (Honours) graduate
Are you an international student?

While a lot of information in this guide is relevant to you, certain key information may be different for international students.

You are an international student if you are:

• not a citizen of Australia or New Zealand, or
• not an Australian permanent resident, or
• a temporary resident (visa status) of Australia.

Eligibility for UQ study
For admission into undergraduate programs at UQ, you must have:
• completed secondary studies equivalent to Queensland Year 12 with a score comparable to the Queensland rank specified for your program
• satisfied individual program requirements (e.g. specific subject prerequisites, auditions or interviews)
• satisfied English language requirements.

If you do not meet these criteria, you might consider taking the Foundation Year bridging course offered by International Education Services (IES) or English language training offered by the Institute of Continuing and TESOL Education (ICTE-UQ).

Study options at UQ
If you would like to know more about your study options at UQ, enquire through our online form and one of our UQ advisors will respond. Register for an advisory session. If you are in Brisbane, sign up for a campus tour.

We also have a range of publications, including the international undergraduate and postgraduate student guides to help you.

Ask UQ
future-students.uq.edu.au/ask

Advisory sessions
uq.edu.au/international-students/advisory-sessions

Campus tours
future-students.uq.edu.au/campus-tours

Program guides
future-students.uq.edu.au/publications-and-forms

Tuition fees
As an international student, you will pay tuition fees, a Student Services and Amenities Fee, and potentially other administrative fees. UQ has program-based tuition fees for coursework award programs, meaning that all courses within a program are charged at the same tuition fee rate per unit for a given academic year. Some programs also have additional costs.

future-students.uq.edu.au/apply/international/tuition-fees

Other expenses
International students applying to study in Australia must have a student visa or an alternative visa that enables them to study full-time on campus. Please consider expenses such as visa and medical (pre-departure) fees, tuition fees, general living expenses, return airfares, and Overseas Student Health Cover (OSHC) when you plan your budget.

future-students.uq.edu.au/international/cost-living

“...suitable for those who wish to venture into careers relating to exercise/sport and nutrition as well as postgraduate study in fields including medicine, dietetics, physiotherapy, clinical exercise physiology, or sports coaching. I enjoy the self-directed and open learning environment. Upon completion, this degree will give me the opportunity to enrol in the Master of Dietetics Studies which will then allow me to become an accredited practising dietitian.”

Wai Yin Dlys Hor
Bachelor of Exercise and Nutrition Sciences student, Singapore

UQ Pharmacy Experience Day
Woolloongabba 18 August 2019

Come to our UQ Pharmacy Experience Day where you can take a tour and get involved in hands-on pharmacy activities.

Take a guided tour of the UQ School of Pharmacy, located at the Pharmacy Australia Centre of Excellence (PACE), the first precinct in Australia dedicated to pharmacy education.

Rural Access Scheme
Studying a health degree at UQ is closer than you think

The University of Queensland’s Rural Access Scheme supports applicants from Australian rural and regional areas by boosting their entry score for a number of undergraduate health programs.

How does it work?
Rural areas of Australia often have restricted or limited access to educational opportunities, resources and health services compared with those available in cities or larger towns.

To help address these challenges, and if eligible, two adjustments will be added onto your entry rank for the following programs:

• Doctor of Medicine (Provisional Entry)
• Bachelor of Clinical Exercise Physiology (Honours)
• Bachelor of Dental Science (Honours)
• Bachelor of Health, Sport and Physical Education (Honours)
• Bachelor of Midwifery
• Bachelor of Nursing
• Bachelor of Nursing/Midwifery
• Bachelor of Occupational Therapy (Honours)

• Bachelor of Pharmacy (Honours)
• Bachelor of Physiotherapy (Honours)
• Bachelor of Psychological Science (Honours)
• Bachelor of Social Work (Honours)
• Bachelor of Speech Pathology (Honours)

Visit future-students.uq.edu.au/rural-access-scheme
Biomedical scientists are at the forefront of modern healthcare

Why Biomedical Science at UQ?

Biomedical scientists provide the foundation of modern healthcare and assist in developing treatments for diseases. Through cancer screening, diagnosing HIV, designing new drugs, and managing food poisoning and infection control, biomedical scientists are making incredible advances in modern medical science. Working in partnership with doctors, nurses and other healthcare professionals, they carry out clinical tests, evaluate the effectiveness of treatment, and research the causes and cures for disease. By understanding how the human body works and what goes wrong in disease, biomedical scientists apply their knowledge to develop new treatments. This brand new, three-year program provides you with both the breadth and the depth of modern biomedical science.

What you will study

Your courses will cover the broad areas of molecular and cellular biology through to body systems. Take the opportunity to specialise in one or more of these areas in your third year if you wish. You will learn the scientific process through activities ranging from experimental design and hands-on experiments to computer modelling.

Your areas of study

Courses focusing on molecular and cellular biology

Biochemistry and Molecular Biology
Examine the molecules made by living organisms in a cellular context, and apply this knowledge in all areas of biomedical science. You will gain the research tools to address questions on how cells divide, grow, communicate and die, and understand the structure, function and interactions of nucleic acids, proteins, carbohydrates and lipids, and their contribution to cellular activities and processes.

Developmental Biology
Learn how organisms and cells grow and develop according to their genetic blueprint, and understand how genes contribute to the development of organs and tissues. This is central to understanding the basis of human health and disease. It also provides essential knowledge needed for bioengineering and nanotechnology.

Human Genetics
Study the human genome and its significance as the instruction book of life. Contribute to the ethical debate on the use of genetic information and be a part of future discoveries identifying the genetic mechanisms that define what it is to be human. Human Genetics will allow you to employ statistical and mathematical skills needed to analyse large biological data sets generated from sequencing the human genome.

Immunology and Infectious Diseases
You will examine the principles of immunological responses in the body. The biology of microbes, such as bacteria, fungi and viruses, will lead to examining examples of infectious diseases, including HIV, malaria, tuberculosis, SARS and exotic influenza. These are all a threat to global health. Your study of molecular diagnostics will allow you to understand how new vaccines and therapeutic treatments are developed.

Neuroscience
This is a rapidly growing field studying the nervous system, a complex array of billions of interconnected cells responsible for integrating, processing and coordinating sensory information and motor commands. Examine how neuroscience and neural stem cells are being used in new therapeutic strategies to treat neurological and mental illnesses.

Anatomy
Understand human anatomy and anatomical data analysis. Perform tissue dissection and learn about the macroscopic structure of human organs including the musculoskeletal, nervous and visceral systems. You will collect and evaluate anatomical data, gaining insights into human variation in health and disease.

Physiology
Investigate how the body works, applying your knowledge at the molecular and cellular levels to understand integrative control of tissues, organs and systems. Physiology aims to explore normal processes in the body, and the changes that occur in disease. You will gain a unique insight into physiology from many different perspectives.

Practical experience
For more than half of your program, you will benefit from applying theory to practice through practical and laboratory-based experiments.

Career opportunities

The Bachelor of Biomedical Science will help you to embark on a biomedical science career, including:

• hospital and diagnostic clinical laboratories
• biotechnology and pharmaceutical companies
• laboratory work in molecular and cellular biology
• health policy and communication
• secondary schools or other educational institutions, when combined with a teaching qualification.

This program also provides an excellent pathway to study medicine or allied health programs.

Postgraduate options

Higher degrees by research (MPhil and PhD) in your area of interest are available. See page 64 for more information.

For more information

science.uq.edu.au/planner

"The desire to learn more about my brother’s rare condition inspired me to study biomedical science. I wanted to find out everything I could about the physiology and genetics of muscular dystrophy. At school, I found my biology and chemistry classes really interesting and I did an assignment on my brother’s condition in Year 11. That year, my mother and I went to a muscular dystrophy conference and it was there that I really thought about combining these significant interests of mine. My honours year was an unbelievable experience. I was in awe of the technology and resources available at UQ. Being immersed and working with lecturers, tutors and lab staff who were so passionate about their work was wonderful."
Physiology (Honours) will prepare you for an exciting career as an Accredited Exercise Physiologist (AEP), AEP design and deliver exercise interventions that prevent and manage a range of musculoskeletal, cardiovascular, metabolic, neurologic, cancer and mental health conditions. They also provide advanced health and physical activity education, advice and support to help people lead a healthy and active lifestyle. Medicare and most private health insurers recognise and cover services for the delivery of exercise to help prevent and manage a range of chronic health conditions.

Why study the Bachelor of Clinical Exercise Physiology (Honours) at UQ?

The Bachelor of Clinical Exercise Physiology (Honours) student will:

• study at the School ranked as one of the top 5 in the world as reported by three independent world rankings of sport and exercise science (QS World University Rankings by Subject 2018, World Shanghai Rankings, and CEOWorld Magazine)

• undertake more than 550 hours of practical experience designed to optimise your exposure to a wide range of clients and practitioners

• develop advanced knowledge and expertise to prevent and manage many chronic medical conditions, injuries and disabilities

• benefit from our on-campus specialised exercise clinics, where you will develop clinical skills under the supervision of our highly experienced educators

• study a program where our staff and graduates have received numerous Exercise & Sports Science Australia (ESSA) national awards, including Accredited Exercise Physiologist of the Year, Graduate of the Year, Exercise Physiologist Practice of the Year, and ESSA President’s Award

• learn in state-of-the-art exercise science and physiology facilities including specialised biomechanics, motor control, exercise physiology, and strength and conditioning laboratories

• gain accreditation with ESSA as an Accredited Exercise Physiologist and Accredited Exercise Scientist.

Practicals, placements and internships

You will undertake more than 550 hours of practical placements throughout our on-campus specialised exercise clinics and external industry placements. Practical placements provide a structured and engaging experience where you will develop your clinical skills. From Year 2, a variety of sessional practical experiences are undertaken before commencing block placements in Years 3 and 4 of the program. Students may have the opportunity to undertake a placement outside of the Brisbane metropolitan area. In these cases, students fund all or part of their travel, accommodation and living expenses.

Career outcomes

Accredited Exercise Physiologists and Accredited Exercise Scientists work in a variety of settings including private practice, academies and institutes of sport, hospitals and clinical services, home health services, research centres, and community health and fitness centres. Careers include:

• Accredited Exercise Physiologist
• Accredited Exercise Scientist
• biomechanist
• cardiac scientist
• community recreation officer
• corporate health and fitness advisor
• exercise science researcher
• health promotion officer
• rehabilitation professional
• respiratory technician
• strength and conditioning specialist.

Professional memberships

Graduates may be eligible for membership with the following professional body:

• Exercise & Sports Science Australia.

Accreditation body

• Exercise & Sports Science Australia. Completion of the degree may not result in graduates receiving automatic accreditation. Please contact the registration body for details of any conditions for registration.

Additional costs

Annual CPR recertification (approx. $60); First Aid Certificate (including CPR) (approx. $155). Costs for vaccinations and serology are the responsibility of the student and will vary based on individual requirements.

Your postgraduate options

Coursework degrees are available in:

• Master of Audiology Studies
• Master of Physiotherapy Studies
• Master of Sports Coaching
• Doctor of Medicine.

Other non-clinical degrees include:

• Education
• Physiotherapy.

Research degrees (MPHil and PhD) are also available in your area of interest.

Study Clinical Exercise Physiology at UQ and become a qualified Accredited Exercise Physiologist, a recognised allied health professional who specialises in the delivery of exercise to help prevent and manage a range of chronic health conditions.

Sometimes exercise really is the best medicine. Study Clinical Exercise Physiology at UQ and become a qualified Accredited Exercise Physiologist, a recognised allied health professional who specialises in the delivery of exercise to help prevent and manage a range of chronic health conditions.

Students are guaranteed to graduate with Honours

• Biomechanics
• Exercise Prescription and Programming for:
  • Aging, Metabolic Disease and Cancer
  • Cardiovascular Disease
  • Musculoskeletal Conditions
  • Neurological Conditions
• Exercise Science Technical Skills
• Sports Medicine of Physical Activity

10 HEALTH, BEHAVIOURAL SCIENCES AND MEDICINE 2020

11 HEALTH, BEHAVIOURAL SCIENCES AND MEDICINE 2020
Learn at Australia’s largest and most advanced tertiary oral health facility

Bachelor of Dental Science (Honours)

Delivered at the UQ Oral Health Centre, Australia’s largest and most advanced tertiary dental facility, this program provides the knowledge and skills to prevent, diagnose, and treat oral diseases and abnormalities, preparing you for an exciting career as a qualified dentist.

Why study the Bachelor of Dental Science (Honours) at UQ?

The Bachelor of Dental Science (Honours) educates the next generation of dental professionals at the most advanced tertiary oral health facility in Australia, the UQ Oral Health Centre. You will:

- enjoy the benefits of smaller cohorts with dedicated and specialist teachers
- learn the science and acquire the technical skills to care for patients, and prevent, diagnose and treat oral diseases and abnormalities
- commence pre-clinical (simulated) placements from your first semester, and develop in-depth knowledge in the basic sciences, which provide the clinical and biomedical foundations relevant to dentistry
- move into clinical treating patients in your second year as part of our oral health alliance with the Metro North Hospital and Health Service. This experience is broadened in your third and fourth years
- undertake in your final year an extensive placement (across 40 weeks)
- develop in-depth knowledge of general practice dentistry, periodontics, endodontics, prosthodontics, oral medicine, oral and maxillofacial surgery, and public health
- master the technical skills and knowledge needed to provide quality oral healthcare and make a genuine difference to the lives of others.

UQ’s School of Dentistry is one of the most respected dental schools in Australia, and has been educating students since 1937.

Practicals, placements and internships

You will undertake supervised clinical placements in a range of clinical settings including the UQ Oral Health Centre, as well as other government and Aboriginal and Torres Strait Islander health service clinics throughout Queensland and interstate. During your placements, you will have the opportunity to apply the theoretical knowledge learnt in class and develop your clinical skills in real-life settings. Students may receive the opportunity to undertake a placement outside of the Brisbane metropolitan area. In such cases, students fund all or part of their travel, accommodation and living expenses.

What you need to apply

If you are an Australian or New Zealand citizen you must sit the University Clinical Aptitude Test (UCAT) unless you are applying via the Aboriginal and Torres Strait Islander alternative entry scheme. Registrations open from March in the year of application. See ucatofficial.com/uca/t-anz

Career outcomes

Once registered with the Dental Board of Australia, you can establish your own private practice, work within an established practice, or join a partnership. Within the public sector, there are opportunities to work within hospitals, community health services, or school based dental clinics across Australia. The Australian Defence Force also accepts dental officers on either a short service or permanent basis (subject to citizenship/permanent residency).

Professional memberships

Graduates may be eligible for membership with the following organisations:

- Australian Dental Association
- Royal Australasian College of Dental Surgeons

Accreditation body

- Australian Dental Council

While this program is accredited by an official industry body in Australia, completing this degree may not result in automatic registration for graduates. Please contact the relevant registration body for details.

Additional costs

First Aid Certificate including CPR (approx. $155), annual CPR recertification (approx. $60), dental instruments and equipment (approx. $1500), lab coat (approx. $50), laptop computer (at the student’s discretion), safety glasses (approximately $25), annual purchase of minimum number of teeth for compulsory preclinical learning activities (depending on number of years in program, a current First Aid Certificate (including CPR and Blue Card). You will also be required to provide evidence that you do not carry bloodborne transmissible viruses or tuberculosis (TB) and comply with a schedule of vaccinations.

Why apply to UQ?

- Located at the UQ Oral Health Centre, Australia’s largest and most advanced tertiary dental health centre, this program provides the knowledge and skills to prevent, diagnose, and treat oral diseases and abnormalities, preparing you for an exciting career as a qualified dentist.

For more information:

future-students.uq.edu.au

I was attracted to the early preclinical training and peer clinic sessions offered within the Bachelor of Dental Science (Honours). From the first day of the program, I was exposed to clinic rooms and dental labs filled with state-of-the-art instruments and equipment. Exposing me to a clinical environment while under the guidance of UQ’s expert teaching staff, has made me comfortable with navigating through the entire dentistry climate. UQ Student Services is readily accessible and offers great support to students – especially when you are first starting at UQ. The UQ Union also provides great services and getting involved in activities and clubs has balanced my student life. I enjoy activities such as free weekly dinners where I become closer with my peers. I think the culture here in Brisbane complements UQ’s academic programs.

Bachelor of
Exercise and Nutrition Sciences

Through the study of exercise, nutrition and applied sciences, this program is a springboard to a range of exciting health careers in areas including dietetics, medicine, physiotherapy, exercise physiology, and more.

Why study the Bachelor of Exercise and Nutrition Sciences at UQ?

How is the human body and its health influenced by diet and exercise? What drives people to consume high levels of fats, salts and sugars, and what are the impacts? The Bachelor of Exercise and Nutrition Sciences provides a framework and way of thinking to answer questions like these. Whether you’re interested in exercise and nutrition, or a broader career in health, this program recognises the strong link between good nutrition, regular exercise and optimum health, so you can make a meaningful difference to the wellbeing of others. You will:

• study the latest industry equipment in specialist biomechanics and motor control, as well as exercise physiology and strength conditioning laboratories
• learn about the human body across a broad range of study areas, including the science of exercise, nutrition and food, physical activity and preventative health, and the psychology of sport and exercise
• study a flexible program, which can lead to clinical or non-clinical careers such as medicine, dietetics, clinical exercise physiology, physiotherapy, occupational therapy, occupational health and safety, public health, or sports coaching

Clinical careers (after further study) include:

• audiologist
• clinical exercise physiologist
• dietitian – this program is a preferred pathway to study dietetics at UQ
• doctor
• occupational health and safety officer
• occupational therapist
• physiotherapist
• speech pathologist.

You can become a fully accredited dietitian in four-and-a-half years by gaining a place in the Bachelor of Exercise and Nutrition Sciences graduate / Master of Dietetics Studies program. We will guarantee you a place in the Master of Dietetics Studies when you graduate from the Bachelor of Exercise and Nutrition Sciences, providing you complete the program in the minimum time specified, achieve an annual Grade Point Average of 5.0 (on a 7-point scale) and undertake the necessary prerequisite subjects.

Honours

Honours is available as an additional year after completion of the bachelor degree at UQ as my passion through food and health was one of my top priorities and something that I knew I always wanted to achieve. The course list included a broad range of both nutrition and public health/health promotion subjects that I was particularly interested in.”

Keira Murray
Bachelor of Exercise and Nutrition Sciences graduate / Master of Dietetics Studies student

• speech pathologist.

You can become a fully accredited dietitian in four-and-a-half years by gaining a place in the Bachelor of Exercise and Nutrition Sciences graduate / Master of Dietetics Studies program. We will guarantee you a place in the Master of Dietetics Studies when you graduate from the Bachelor of Exercise and Nutrition Sciences, providing you complete the program in the minimum time specified, achieve an annual Grade Point Average of 5.0 (on a 7-point scale) and undertake the necessary prerequisite subjects.

Honours

Honours is available as an additional year after completion of the bachelor degree at UQ as my passion through food and health was one of my top priorities and something that I knew I always wanted to achieve. The course list included a broad range of both nutrition and public health/health promotion subjects that I was particularly interested in.”

Why study the Bachelor of Exercise and Nutrition Sciences at UQ?

A flexible degree you can tailor towards your future career path

Through the study of exercise, nutrition and applied sciences, this program is a springboard to a range of exciting health careers in areas including dietetics, medicine, physiotherapy, exercise physiology, and more.

Clinical careers (after further study) include:

• audiologist
• clinical exercise physiologist
• dietitian – this program is a preferred pathway to study dietetics at UQ
• doctor
• occupational health and safety officer
• occupational therapist
• physiotherapist
• speech pathologist.

You can become a fully accredited dietitian in four-and-a-half years by gaining a place in the Bachelor of Exercise and Nutrition Sciences graduate / Master of Dietetics Studies program. Study the Bachelor ranked TOP 5 in the world for sport and exercise science in 2018

Why study the Bachelor of Exercise and Sport Sciences (Honours) at UQ? Would you like to help elite athletes be the best they can be, get your community fit and healthy, or rehabilitate injury in healthy people wanting to be more physically active? Study the Bachelor of Exercise and Sport Sciences (Honours) at UQ and you’ll develop the expertise to become a professional leader in the field. Accredited Exercise Scientists (AES) help people recover from injury, maximise the performance of elite athletes, promote healthy ageing and generally improve people’s health and wellbeing.

UQ’s Bachelor of Exercise and Sport Sciences (Honours) explores the complex nature of human movement and how the body reacts to acute and chronic physical activity. The degree prepares students in terms of general fitness regimens, recreational activities and elite sports. You will have the opportunity to study the biology, technology, behaviour and best practices that underpin exercise and sport sciences, as well as:

- graduate with a highly respected honours qualification
- focus your study on a specialisation of your choice such as elite athlete development, sports conditioning and performance, clinical measurements, or corporate and community health and fitness
- gain 500 hours of practical placements that provide hands-on experience with real clients in a supervised environment
- benefit from the latest industry equipment in the school’s own specialist biomechanics, motor control, exercise physiology and strength conditioning laboratories and health clinics.

As a graduate, you will be eligible to apply for membership of the peak national accrediting body, Exercise & Sports Science Australia (ESSA) as an Accredited Exercise Scientist (AES) and an Accredited Sport Scientist (ASS).

Practicals, placements and internships
Your practical placements will take place in a range of settings including sporting academies and institutes, professional sporting teams (e.g., Brisbane Broncos, Queensland Firebirds and Brisbane Roar), hospitals and local government, and a variety of healthcare organisations and fitness facilities. You will apply your theoretical knowledge to practice and develop your skills in real-life settings.

Career outcomes
Career opportunities are varied and may include developing strength and conditioning programs to assist elite athletes and sporting teams, prescribing and delivering exercise and physical activity programs in the fitness industry, delivering workplace health promotion and executive health management programs, or conducting diagnostic measurements (cardiac, sleep, respiratory or neurophysiology) in hospitals or other clinical services.

Career options include:
- Accredited Exercise Scientist
- Accredited Sport Scientist+
- biomechanist
- cardiac scientist
- community recreation and fitness officer
- corporate health and fitness adviser
- health promotion officer
- researcher/academic
- respiratory technician
- strength and conditioning specialist.

Professional memberships
Graduates may be eligible for membership with the following professional body:
- Exercise & Sports Science Australia.

Accreditation body
- Exercise & Sports Science Australia. Completion of the degree may not result in graduates receiving automatic accreditation. Please contact the registration body for details of any conditions for registration.

Additional costs
Annual CPR recertification (approx. $60); First Aid Certificate (including CPR) (approx. $155); costs for vaccinations and serology are the responsibility of the student and will vary based on individual requirements.

Study at the School ranked TOP 5 in the world for sport and exercise science in 2018

QS World University Rankings for Subject, Shanghai Rankings, and CEOWorld Magazine

Bachelor of Exercise and Sport Sciences (Honours)

Study exercise and sport sciences at UQ and discover how to improve performance, health, and participation in exercise and physical activity. As an Accredited Exercise Scientist, you will help build healthier communities and stronger athletes through training, coaching, advice and research.
Bachelor of Health Sciences

This flexible program sets you up for a successful career in health because it provides students with a foundational perspective on human health from the cell to public policy. It is also a pathway to a number of postgraduate programs, including medicine.

Why study the Bachelor of Health Sciences at UQ?

Health Sciences opens the door to a world of career opportunities in health where you can make a difference to the lives of many. This program has been created in consultation with the health industry, which means you can learn the most relevant, up-to-date theory and gain hands-on experience to help you graduate job-ready. You will learn from some of the country’s leading experts in health, and the placement program in your third year means you graduate with the practical skills and knowledge to pursue a rewarding career in health.

The degree incorporates study in areas including biomedical sciences (e.g. anatomy, physiology and biochemistry), public health (e.g. policy, and disease control), preventative health (e.g. health promotion, physical activity and nutrition), the business of health (e.g. health systems) and professional practice (e.g. law and ethics). It is a flexible health degree designed to prepare you for a clinical or non-clinical career. In your third year you will undertake 90 hours of practical (non-clinical) placement to gain hands-on industry experience.

Career outcomes

Whether you want a clinical career to treat and prevent illness in the community, or to work behind the scenes in the business of health, this degree is your pathway to a rewarding career. Non-clinical careers that focus on preventing illness and disease, and where you can use your skills in the assessment, management, planning and delivery of efficient, quality healthcare, may include:

- community health clinician manager
- health promotion officer, community health officer, project officer
- health service manager or health information officer in hospitals and other healthcare facilities
- public health researcher.

Clinical careers:

- Doctor of Medicine – the Bachelor of Health Sciences is a pathway to study medicine at UQ and is open to students who receive a provisional place in the Doctor of Medicine. Students who don’t receive a provisional place can complete the Health Sciences degree and sit the GAMSAT exam to apply for graduate entry into medicine.
- Other clinical options – if you don’t receive the DP required for direct entry into your chosen clinical degree, you can study the Bachelor of Health Sciences first and then undertake postgraduate study to complete your clinical degree. Alternatively, you can study Health Sciences for one year and then re-apply via QFAC for entry into your chosen program.

Clinical careers (after further study) include:

- audiologist
- doctor
- nurse
- occupational therapist
- physiotherapist

- social worker
- speech pathologist.

Practicals, placements and internships

Our Practicum in Health Sciences course provides final-year Health Sciences students with hands-on experience in a non-clinical, health-related work environment. The placement uses the students’ accumulated knowledge and skill base and prepares them for future employment within the healthcare industry. The placement delivers important vocational skills and provides students with complementary workplace-based experience. Students are required to hold a current Blue Card (Working with Children Check) and have a current Hepatitis B vaccination.

Honours

The one-year honours program is designed to provide graduates with the fundamental skills in the development, application, and knowledge translation of health-related research project. The program is intended for high-performing undergraduate students who want to pursue a research career or to gain more skills in research. The program is self-directed with students receiving guided one-on-one supervision to pursue a topic of their choice.

Alexa Sheppard
Bachelor of Health Sciences

"I’ve always been interested in health and medicine, but never wanted to be a doctor. Health Sciences was the best way to contribute and help large groups of people stay healthy. During my degree I worked with Dance for Parkinson’s, a community organisation that enables people with Parkinson’s disease to express themselves in a way they may not be able to normally."

Participate in more than 100 days of professional teaching experience including a full school term placement in your final year.

Bachelors of Health, Sport and Physical Education (Honours)

Teachers play a vital role in encouraging healthy habits and motivating younger generations to be healthy and active. When you help young people to discover the fun of physical activity and the importance of being healthy, you'll be influencing their attitudes for life.

Why study the Bachelor of Health, Sport and Physical Education (Honours) at UQ?

UQ’s Bachelor of Health, Sport and Physical Education (Honours) educates the next generation of specialist health, sport and physical education teachers, and junior science teachers. It is the longest-running university-based physical education program in Australia, with more than 70 years of teaching, research and graduate excellence. Learn how to help young people explore a range of sport and physical activities confidently and competently, and develop a lifelong love of being healthy and active. You will engage in extensive practical learning experiences, as well as develop a solid understanding of the sciences behind human movement including biomechanics, motor development, psychology, skill acquisition, and exercise physiology. You will also:

- put theory into practice with more than 100 days of professional teaching experience, including a full school term placement in your final year.
- be taught by leading academics who are also active researchers in areas such as health and physical education curriculum, young people and physical activity, digital technology in health and physical education, and school-based health education.
- learn and train in world-class sporting facilities.
- graduate with a highly respected honours qualification, with advanced knowledge and skills that will set you apart in the job market.
- study at one of the best human movement schools in Australia, where our staff and research have been independently ranked as among the best in the world – with sports related subjects at UQ ranked 3rd in the world (2018 QS World University Rankings by Subject).
- enjoy the benefits of smaller cohorts and interactive student-centred learning experiences.
- have fun – learning experiences in this program have been purposely designed to be fun, involve physical activity and encourage team work.

Practicals, placements and internships

You will undertake more than 100 days of supervised teaching experience in a range of settings including primary, secondary and schools for children with special needs. Apply your theoretical knowledge to practice and develop your teaching skills in a real-life setting. The practical teaching experience in your third year includes observing a primary school program for five days, participating as a staff member at a secondary school for at least 25 days and spending one day per week at a primary school planning and implementing Health, Sport and Physical Education (HPE) lessons. In your final year you will be immersed in the life of a school for 12 weeks and, in particular, the HPE department. By week five of this placement, you will be teaching a full load in HPE and junior science. Students may receive the opportunity to undertake a practical placement outside of the classroom. In such occasions, students fund all or part of their travel, accommodation and living expenses.

Career outcomes

Our graduates pursue a broad range of careers as confident and capable educators in schools and community environments. You will qualify as a specialist teacher of physical education, health education and junior science that is recognised worldwide. Other career opportunities include:

- corporate health officer
- director of physical performance
- health promotion officer
- outdoor education coordinator
- recreation manager
- research and academia
- sports academy, charity and institute roles
- sports administrative officer
- sports coach.

Professional memberships

Graduates may be eligible for membership with the following professional bodies:

- Australian Council for Health, Physical Education and Recreation
- Queensland College of Teachers.

Accreditation body

- Queensland College of Teachers.

Accreditation body

Qualification for teacher registration in Australia, which involves additional costs.

Your postgraduate options

Coursework degrees are available in:

- Master of Educational Studies
- Master of Sports Coaching

Higher degrees by research (MPHil and PhD) are also available in your area of interest.

Sample courses

Contemporary Approaches to Teaching Movement Leadership, Innovation and Research in HPE Sport Coaching: Learning, Talent and Performance Technology, HPE and Sport Youth, Sport and Physical Culture

Jared D’Roza
Bachelor of Health, Sport and Physical Education (Honours) graduate

“At UQ I was able to develop both my interpersonal skills while honing my skills as an educator. On completion of my degree at UQ, I was confident that I had obtained the necessary skills needed to begin my career as a teacher. Through interaction with the fantastic, knowledgeable staff and a wide variety of learning experiences, I feel that UQ provided me with a complete university experience to prepare me for the start of my teaching career.”

HEALTH, BEHAVIOURAL SCIENCES AND MEDICINE 2020

HEALTH, BEHAVIOURAL SCIENCES AND MEDICINE 2020
Doctor of Medicine

Study medicine at UQ and you will join one of the best and most international medical schools in Australia. With more than 3500 hours of clinical placement during your degree, you’ll gain the hands-on experience, advanced skills and knowledge to help you graduate well prepared for a successful medical career.

Why study the Doctor of Medicine at UQ?

The Doctor of Medicine (MD) is a postgraduate-entry program that aims to be internationally renowned for our outstanding people, the diversity of our student intake, and the excellence of our education. Graduates are recognised for their social responsibility, critical scientific thinking and drive to be global leaders in healthcare. We have a rich and proud history, and a drive to be global leaders in healthcare.

Career opportunities

Ninety-five per cent of UQ MD graduates are employed within a year of graduation. You will be ready to embark on a host of different and complementary career pathways. You may work in patient care, public health, clinical academia and teaching, research or work for aid organisations, the defence forces or set up your own private practice.

Why the change?

Our revised process is designed to ensure the highly sought-after places in the MD program are offered to applicants who demonstrate the attributes and abilities most suited to the profession of medicine and to those who are most likely to succeed in the MD program.

Plan ahead

To ensure that you are up to date with the changes and understand what you can do to best prepare yourself for applying for the MD program, we have developed a quick reference table (above).

For more information

medicine.uq.edu.au

Changes to MD program selection process

There are two main changes to the selection process for the UQ MD program:

1. The introduction of Multile Mini Interviews (MMI) as a part of the selection process.
2. The introduction of prerequisite subjects to ensure students are academically well prepared for the program.

The changes will be progressively introduced between 2019 and 2022, allowing prospective students ample time to prepare.

Preparing global leaders in Medicine
Application requirements

There are two points at which you can apply for a place in the UQ MD program.

Doctor of Medicine Provisional Entry:

• School leavers can apply for the UQ MD program if they have completed Year 12 with an Overall Position of 1 and have Year 12 English. In addition, they need to sit the University Clinical Aptitude Test (UCAT) in the year of application and intend to enrol for a three-year undergraduate degree at UQ. ucatofficial.com/ucat-anz

• A provisional offer is made based on the ranking of the UCAT-scores and places available.

• Entry to the UQ MD program is confirmed once you have completed your UQ bachelor's degree within the minimum time permitted with an overall Grade Point Average (GPA) of 5.0 and completed two subject prerequisites.

Doctor of Medicine Graduate Entry:

• Applicants applying through this pathway must achieve a GPA of 5.0 in their latest degree (minimum three-year bachelor's degree) and successfully complete the Graduate Medical School Admissions Test (GAMSAT). gamsat.uq.edu.au

• Eligible applicants will be invited to participate in a multiple mini interview (MMI) based on their ranking of their overall GAMSAT score and places available. Following the completion of an MMI, applicants will be selected for an interview for the 2020 intake. This includes domestic and international applicants. Eligible Provisional Entry Applicants will be invited for interview in 2020 for the 2021 intake. medicine.uq.edu.au/mmis

• Aboriginal and Torres Strait Islander Admissions Pathway: UQ MD program is committed to increasing the diversity of the medical workforce. There are three pathways available to applicants who identify as an Aboriginal and/or Torres Strait Islander person:
  - admission pathway for undergraduate programs
  - admission pathway for the Doctor of Medicine (Provisional Entry)
  - admission pathway for the Doctor of Medicine (Direct Entry).

Specific requirements apply to the MD admission pathways - see bit.ly/atis-admissions-pathway.

Supplementary information

• Subject prerequisites: From 2022, all medical students need to have successfully completed two subject prerequisites or equivalent courses. The subject prerequisites are:
  - Integrative Cell and Tissue Biology*
  - System Physiology*
  *or equivalent courses or coursework in your major.

When selecting an undergraduate degree at UQ or elsewhere which does not automatically include these two subject prerequisites, the applicant will need to check that their chosen undergraduate program allows them to study these two subject prerequisites (or equivalents) as an elective. As a supportive measure for all future medical students, it is also recommended that applicants aim to undertake courses in Biostatistics and Anatomy during their undergraduate degree. medicine.uq.edu.au/prerequisites

• Multiple Mini Interviews (MMI): MMIs are a values-based recruitment method. Applicants move through a circuit of several stations, with different interviewers asking questions and scoring the applicant’s performance. In 2019 the Faculty of Medicine will invite eligible Graduate Entry applicants for an interview for the 2020 intake. This includes domestic and international applicants. Eligible Provisional Entry Applicants will be invited for interview in 2020 for the 2021 intake. medicine.uq.edu.au/mmi

• Inherent requirement to study medicine

The Faculty of Medicine is committed to supporting the physical and mental health of all applicants. We encourage applicants to familiarise themselves with the Inherent Requirements to Studying Medicine in Australia and New Zealand before applying. bit.ly/2tUkbo3

Feel free to contact Student Services for a confidential discussion before you apply. Email ssherton@uq.edu.au for more information.

• Bonded Medical Places Scheme: This is an Australian Government scheme that aims to proactively improve the provision of healthcare and reduce the doctor shortage outside metropolitan areas across Australia. In 2019, 28 per cent of all Commonwealth-supported places are allocated to this scheme. If you accept an offer under this scheme, you will commit to working in an area of workplace shortage for three years after completing your degree. Specific requirements apply to this MD program scheme. health.gov.au/bmpscheme

• Rural Background Students (RBS): This initiative was designed to help the rural and remote areas of Australia. In 2019, 28 per cent of places are allocated to applicants who have lived for a minimum time permitted with an overall Grade Point Average (GPA) of 5.0 and remote areas of Australia. In 2019, 28 per cent of all Commonwealth-supported places are allocated to this scheme. If you accept an offer under this scheme, you will commit to working in an area of workplace shortage for three years after completing your degree. Specific requirements apply to this MD program scheme. health.gov.au/bmpscheme

Inherent requirement to study medicine

The Faculty of Medicine is committed to supporting the physical and mental health of all applicants. We encourage applicants to familiarise themselves with the Inherent Requirements to Studying Medicine in Australia and New Zealand before applying. bit.ly/2tUkbo3

Feel free to contact Student Services for a confidential discussion before you apply. Email ssherton@uq.edu.au for more information.

Other requirements and additional costs

There are other cost associated with enrolling in the MD program. Students are expected to pay for their own First Aid Certificate (including CPR); Blue Card to work with children and young people (bluecard.qld.gov.au) and criminal history checks; testing and immunisations (see note page 50), and travel and living expenses associated with placements (see page 50). Enrolled students are expected to provide proof of having undergone screening for blood-borne viruses and immunisation against certain diseases, including Hepatitis B. medicine-program.uq.edu.au/requirements.
Your pathway to Medicine

Plan your journey
Every journey to Medicine is different so to help tailor yours, we have outlined three pathway options. No one option is correct or preferred - make sure you choose an undergraduate degree that interests you.

PATHWAY A
- UQ programs* that cover the prerequisite courses and provide health professional registration before entry to the MD:
  - Bachelor of Dental Science (Honours)
  - Bachelor of Midwifery
  - Bachelor of Nursing / Bachelor of Midwifery
  - Bachelor of Nursing
  - Bachelor of Pharmacy (Honours)
  - Bachelor of Physiotherapy (Honours)
  - Bachelor of Speech Pathology (Honours)

PATHWAY B
- UQ programs* with study plans that cover the prerequisite courses, or have elective space, before entry to the MD:
  - Bachelor of Advanced Science (Honours)
  - Bachelor of Biomedical Science
  - Bachelor of Clinical Exercise Physiology (Honours)
  - Bachelor of Exercise & Nutrition Sciences
  - Bachelor of Exercise and Sport Sciences (Honours)
  - Bachelor of Health Sciences
  - Bachelor of Science (various majors)

PATHWAY C
- UQ programs* with limited elective space that could cover the prerequisite courses with careful planning before entry to the MD:
  - Bachelor of Arts
  - Bachelor of Engineering (Honours)
  - Bachelor of Psychological Science (Honours)
  - Bachelor of Social Science

*Program lists are not exhaustive. Prospective MD students should discuss alternative programs that are not listed with their respective undergraduate program academic advisers. They will work with you to develop an appropriate study plan.

For more information
medicine.uq.edu.au/pathways-medicine

“I was born with a congenital heart defect so I was interested in medicine from a very young age. The most enlightening experience of my degree to date has been my first year medical elective, which I completed in Hue, Vietnam. For me, this elective reinforced the need for doctors from developed countries to visit hospitals in lesser-developed regions to assist with new surgical techniques and better diagnostic abilities. In Hue, I observed a skin graft procedure on an 11-year-old girl who had suffered burns to 80% of her body. It was very confronting, but the opportunity to help her and the ability to scrub in on a surgery for the first time and witness the anatomy of skin grafting was outstanding.”

Dr Andrew Sax
UQ Bachelor of Exercise and Sports Science and UQ Medicine graduate

Bachelor of Midwifery

Enjoy an innovative midwifery program providing practical skills in supporting mothers, babies and families that you can complete within three years to become a qualified midwife. The Bachelor of Midwifery can also be undertaken as a dual degree with a Bachelor of Nursing.

Why study the Bachelor of Midwifery at UQ?

- Safely guiding expectant women and parents through pregnancy, birth and the weeks that follow might be one of the most challenging and rewarding careers there is.
- The Bachelor of Midwifery is a respected and innovative program, developed in consultation with patients, students, midwifery associations and industry partners. The Bachelor of Midwifery adopts an approach to learning that includes lectures, inquiry based workshops and clinical skills, integrating clinical placements in a range of maternity settings. You will:
  - start your practical-based experience in a range of midwifery settings. You will:
  - integrate clinical placements with an approach to learning that includes midwifery associations and industry
  - The Bachelor of Midwifery is a respected program providing practical skills in supporting mothers, babies and families that you can complete within three years to become a qualified midwife. The Bachelor of Midwifery can also be undertaken as a dual degree with a Bachelor of Nursing.

Location

The midwifery program is located at a number of ‘home hospital groups’. On entering your program, you will

- start your practical-based experience in your first semester of study in a range of midwifery settings. You will:
  - benefit from a program that links theory and practice through a variety of teaching methods including narrative workshops, on-line learning and clinical simulation
  - start to make the transition from student to midwife during extended placements in your final year. This extended clinical experience will help to consolidate the skills and knowledge to meet the Nursing and Midwifery Board of Australia National Competency Standards for the Midwife.

Practicals, placements and internships

- You will undertake over 1000 hours of supervised clinical placements in a range of clinical settings that include hospitals and a variety of other healthcare organisations. Included in these hours are 20 ‘Continuity of Care’ experiences that are completed over the duration of the program. This involves accompanying a woman and her family through the pregnancy, birth and the postpartum experience. In your final year, the Clinical Placement Unit will arrange your clinical placement where you will apply your theoretical knowledge to practise and develop clinical skills in real-life settings.

Other requirements

- At the start of the program, you will be required to complete a medical questionnaire, supply a criminal history check, and obtain, and thereafter comply with a schedule of vaccinations.

Additional costs

- Annual CPR recertification (approx. $60); First Aid Certificate (including CPR) (approx. $155); clinical uniform shirt (may be purchased from the school), criminal history check ($45). For costs for vaccinations and serology are the responsibility of the student and will vary based on individual requirements.

Your postgraduate options

- Higher degrees by research (MPhil and PhD) are also available in your area of interest.

SAMPLE COURSES

- Critical Illness in the Mother and Neonate Evidence-Based Practice
- Health Complexities in Pregnancy
- Integated Biomedical Sciences for Midwifery
- Woman-Centred Care towards a Philosophy of Practice
- Working with Aboriginal and Torres Strait Islander People

Cassandra Hockley

Bachelor of Midwifery graduate

“Placement was hands down the most valuable experience I’ve had whilst studying the Bachelor of Midwifery at UQ. I completed all three years of my placement at Redland Public Hospital in women and birthing. This was an excellent experience in which I felt completely supported and welcome. I was also able to practice to my full scope of practice as a student and easily completed my requirements for the degree.”

Bachelor of Midwifery

Start your practical learning in a hospital in your first semester

Bachelor of Nursing

Practise person-centred care across diverse, complex and dynamic healthcare environments in a program that you complete within three years to become a fully qualified nurse. The Bachelor of Nursing can also be undertaken as a dual degree with a Bachelor of Midwifery.

Why study the Bachelor of Nursing at UQ?
 If you’re looking for an important and in-demand career where you make a difference to the lives of others, choose UQ’s Bachelor of Nursing. This innovative program was developed in consultation with consumers, students, professional associations and industry partners. It adopts a narrative and inquiry-based approach to learning, integrating clinical placements in major teaching hospitals, community and other healthcare settings. You will:
• become a competent, capable and caring professional registered nurse who works in partnership with healthcare consumers and patients
• start your practical-based healthcare experience in your first semester of study, where you will undertake rostered clinical placement shifts, as well as clinical skills simulation sessions
• benefit from a program that prepares you to be a nursing leader of the future
• consolidate your knowledge and skills and develop your confidence through extended clinical placements in your final year to streamline your transition from a student to a registered nurse.

Practicals, placements and internships
 You will undertake more than 1000 hours of supervised clinical placements in a range of clinical settings that include hospitals and a variety of other healthcare organisations. The Clinical Placement Unit will arrange your placement, where you will apply your theoretical knowledge to practice and develop clinical skills in real-life settings. Clinical placement opportunities in your final year include fields such as critical care, emergency medicine, paediatrics, aged care, rural, and mental health. Students may have the opportunity to undertake a placement outside of the Brisbane metropolitan or surrounding areas. In such cases students fund all or part of their travel, accommodation and living expenses, but funding towards travel and living expenses may be available for some rural placements. Subsidised international placement opportunities may be available subject to funding.

Location
 The nursing program is located at a number of ‘home hospital groups’. Upon entering your program you will preference and then be allocated to a home hospital group. This means that you will predominantly undertake your clinical placements within this group of hospitals and their associated health services. However, to ensure you receive a broad range of experiences, you may be required to undertake placement activities at other clinical partner sites. The clinical partner sites include:
• Ipswich Hospital
• Logan Hospital
• Mater South Brisbane
• Mater Redland
• Mater Springfield
• Aged care nursing homes (various sites)
• Queen Elizabeth II Jubilee Hospital
• Redland Hospital
 Each of the home hospital groups offers a range of services including primary, secondary or tertiary healthcare. While every effort is made to place you in your preferred home hospital group, places are limited at each site and are subject to change. See nmsw.uq.edu.au/clinical-placements for more information.

Accreditation body
• Australian Nursing and Midwifery Accreditation Council.
Completion of the degree may not result in graduates receiving automatic registration. Contact the accreditation body for details of conditions of registration.

Additional costs
Annual CPR refresher certification (approx. $60); First Aid Certificate (including CPR) (approx. $55); clinical uniform (approx. $155) and Blue Card. You will also be required to provide evidence that you do not carry blood-borne transmissible viruses (e.g. tuberculosis and HIV) and comply with a schedule of immunisations.

Career outcomes
Our graduates work in various healthcare and practice settings, which include:
• major public and private tertiary hospitals and rural and remote healthcare settings including:
  – child health
  – critical care areas, e.g. emergency
  – medical surgical areas
  – mental health
  – paediatrics
  – drug and alcohol units
  – child health
  – community and primary care
  – mental health
  – aged care areas
  – research, academia and clinical teaching.

Professional memberships
Graduates may be eligible for membership with the following professional body:
• Australian College of Nursing.
Nursing / Midwifery

Bachelors of

Graduate with two degrees in four years

Gain extensive practical experience and graduate with two degrees from one of Australia’s leading nursing and midwifery schools in four years. Gain hands-on, real-life experience from the earliest stages of the program and complete more than 1000 hours of clinical placements to ensure you are job-ready on graduation.

Why study the Bachelors of Nursing / Bachelor Midwifery at UQ?

Nursing and midwifery are exciting, diverse and rewarding careers where you can make a true difference to the lives of others. UQ’s innovative Bachelors of Nursing / Midwifery dual degree program takes a narrative and patient/woman-focused approach to learning, integrating practice across diverse, complex and dynamic healthcare environments. You will:

- gain specific knowledge and professional recognition across two programs
- become a competent, capable and caring professional who works in partnership with women, healthcare consumers, and patients and their families
- start your practical-based healthcare experience in your first semester of study, where you will undertake rostered clinical placement shifts, as well as clinical skills simulation sessions
- benefit from a program that links theory and practice through a variety of teaching methods including narrative workshops, online learning and clinical simulation
- integrate theory with practice across a range of healthcare settings
- consolidate your knowledge and develop your confidence through extended clinical placements in your final year to streamline your transition from a student to a registered nurse and midwife.

Practicals, placements and internships

You will undertake more than 1000 hours of supervised clinical placement in a range of clinical settings that include hospitals and a variety of other healthcare organisations. Included in these hours are 10 ‘continuity of care’ experiences that are completed over the duration of the program. Providing continuity of care involves accompanying a woman and her family through the pregnancy, labour, birth and the postpartum experience. The Clinical Placement Unit will arrange your placement, where you will apply your theoretical knowledge to practice and develop clinical skills in real-life settings. You will also have opportunities to engage with innovative models of healthcare such as telehealth.

Students may receive the opportunity to undertake a placement outside of the Brisbane metropolitan area. In such cases, students fund all or part of their travel, accommodation and living expenses. Additionally, subject to funding, subsidised international placement opportunities may be available.

Location

The Bachelor of Nursing / Midwifery is located at a number of ‘home hospital groups’. On entering the program you will be required to complete a medical questionnaire, supply a criminal history check and, and hold for the duration of the program, a current First Aid Certificate (including CPR) and Blue Card. You will also be required to provide evidence that you do not carry blood-borne transmissible viruses of tuberculosis (TB) and comply with a schedule of immunisations.

Career outcomes

Our graduates work in various healthcare and practice settings, including:
- major public and private tertiary hospitals
- antenatal, birth suite and postnatal areas
- critical care areas (e.g. emergency) / medical surgical areas
- mental health
- paediatrics and child health
- rural, remote and community healthcare settings
- community and primary care nursing
- drug and alcohol units
- mental health
- midwifery group practice
- aged care areas
- research, academia and clinical teaching.

Professional memberships

Graduates may be eligible for membership with the following professional bodies:
- Australian College of Midwives
- Australian College of Nursing.

Accreditation body

- Australian Nursing and Midwifery Accreditation Council.

Admission requirements

Graduates of the degree may not result in registration. Contact the registration body for details of conditions for registration.

additional costs

Annual CPR recertification (approx. $60); First Aid Certificate (including CPR) (approx. $155); clinical uniform shirt (may be purchased from the school); criminal history check ($45). Costs for vaccinations and xenoradiology are the responsibility of the student and will vary based on individual requirements.

Your postgraduate options

Postgraduate coursework study is available in:
- Master of Advanced Nursing
- Master of Mental Health Nursing
- Master of Nurse Practitioner.

Research higher degrees (MPhil and PhD) are also available in your area of interest.

Emma Shayler

Bachelors of Nursing / Midwifery graduate

"I have a passion for working with people and love the idea of being able to support others at a vulnerable time in their lives. I have been lucky to do my placements at the Royal Brisbane and Women’s Hospital and Ipswich General Hospital. In my final semester I travelled to Rockhampton to work with the Royal Flying Doctors Service. This opportunity allowed me to fly to multiple towns across Queensland to help those who were sick or injured. This experience has inspired my desire to be a flight nurse for RFDS in the future."

Bachelor of Occupational Therapy (Honours)

Combining theory and clinical practice, this program covers occupational therapy practice across a range of clinical and community contexts, enabling people to overcome barriers and engage in everyday activities that are meaningful and important to them.

Why study the Bachelor of Occupational Therapy (Honours) at UQ?

Occupational therapists help people of all ages overcome barriers that affect their ability to engage in the everyday activities that are meaningful and important to them. These everyday activities can range from tying shoelaces, writing or cooking, through to going to work and driving a car. They use a range of approaches to develop, recover or maintain the person’s engagement in these important everyday activities despite challenges from injury or illness, psychological or emotional difficulties, developmental delays, or ageing.

Occupational therapists also work collaboratively with their clients to identify what is required to support their engagement in these activities. These activities include managing tasks, such as modifying tasks or the environment, skill development and education. Occupational therapists often work closely with professionals in physiotherapy, speech pathology, education, nursing, and social work.

Study the Bachelor of Occupational Therapy (Honours) at UQ and you will join one of the leading schools for health and rehabilitation sciences in Australia with a long tradition of teaching, research and graduate excellence. You will:

• develop a thorough understanding of the theory and practice of occupational therapy, as well as knowledge of the medical, social, behavioural, psychological and psychosocial sciences
• gain practical experience from ‘Year 1’ in a variety of community and healthcare settings, in onsite clinics and external partnerships throughout Queensland
• undertake simulated learning activities in the school’s six-bed simulation ward and simulation house
• acquire a thorough understanding of the theory and practice underpinning occupational therapy. You’ll develop knowledge of the medical, social, behavioural, psychological, and psychosocial sciences that will aid you in helping people recover
• graduate with a highly respected honours qualification, with advanced knowledge and skills that will set you apart in a competitive job market and provide a pathway to future research or learning.

Practicals, placements and internships

You will undertake 1000 hours* of supervised clinical practice in a range of clinical settings including hospitals, educational facilities, other healthcare organisations, private practice and UQ’s Occupational Therapy clinics. During your placements, you will have the opportunity to apply your theoretical knowledge to practice and develop your clinical skills in real-life settings.

Career opportunities

Our graduates find employment in settings such as:

• community health centres and agencies
• industry and government institutions
• injury prevention and injury rehabilitation for workers
• primary, secondary schools and schools for children with special needs
• private practice
• public and private hospitals (including paediatric, adult and psychiatric centres)
• research institutions
• residential centres.

Our graduates are equipped with sharp critical thinking and problem-solving skills, and highly developed communication skills, which, with further study, can be used to pursue a career in professional research or academia.

Professional memberships

Graduates may be eligible for membership with the following professional body:

• Occupational Therapy Australia.

Accreditation body

• Occupational Therapy Council. This program is recognised by the World Federation of Occupational Therapy. Completion of the degree may not result in graduates receiving automatic registration. Contact the registration body for details of conditions for registration.

Additional costs

Annual CPR recertification (approx. $60); First Aid Certificate (including CPR) (approx. $165); clinical uniform shirt (approx. $25); block slacks (either your own or can be purchased for approx. $60). Costs for vaccinations and serology are the responsibility of the student and will vary based on individual requirements.

Postgraduate options

You may choose to pursue postgraduate studies at UQ. Further information is available on the occupations.brisbane.qld.gov.au website.

HEALTH BEHAVIOURAL SCIENCES AND MEDICINE 2020
Bachelor of Pharmacy (Honours)

With pharmacy boasting one of the highest graduate employment rates of any bachelor degree in Australia*, study pharmacy at UQ for a rewarding career where you will make a difference to the lives of others. Learn at the world-class UQ Pharmacy Australia Centre of Excellence from recognised leaders in the field.

**Why study the Bachelor of Pharmacy (Honours) at UQ?**

With a UQ Bachelor of Pharmacy (Honours), you’ll be at the forefront of the pharmacy profession and enjoy one of the highest graduate employment rates of any bachelor degree in Australia, with 97.2% of graduates in full-time employment in 2018. The Bachelor of Pharmacy (Honours) prepares you for a rewarding career in industry, community, hospital pharmacy or government. You will:

- learn at the state-of-the-art Pharmacy Australia Centre of Excellence (PACE), a world-class, $100 million teaching and research facility located in UQ’s biomedical science precinct at Woolloongabba
- develop a strong understanding of chemistry, biology, physiology, anatomy and the pharmacy profession from your first year
- benefit from six integrated streams of study: quality use of medicines, dosage form design, social and professional aspects of pharmacy, drug discovery, biological fate of drugs, and data analysis in pharmacy
- be confident and job-ready when you graduate with extensive practical experience in UQ’s six simulated pharmacies, as well as an eight-week final-year placement in rural or metropolitan Australia or overseas.

**Major in Clinical and Experimental Therapeutics**

In your final year you have the opportunity to complete a year-long research project while working as a part of a research team. You will graduate with a major in Clinical and Experimental Therapeutics (entry based on GPA).

**Practicals, placements and internships**

You will undertake more than 350 hours of supervised clinical placement in a range of clinical settings that include Industrial pharmacy, Hospital pharmacy, Community pharmacy, where you:

- register, commercialise and market pharmaceuticals
- educate and advise patients, doctors and nurses on the appropriate and safe use of medicines.

**Careers**

UQ’s Bachelor of Pharmacy (Honours) leads to careers in:

- **Community Pharmacy**, where you:
  - provide primary healthcare by identifying and treating common ailments
  - dispense prescriptions and give specialist medication advice
  - promote community health, illness prevention and healthy lifestyle choices.

- **Hospital pharmacy**, where you:
  - prepare and supply medicines
  - provide drug information to healthcare professionals
  - educate and advise patients, doctors and nurses on the appropriate and safe use of medicines.

**Industrial pharmacy**, where you:

- manufacture, quality control and undertake clinical trials of new pharmaceuticals
- register, commercialise and market pharmaceutical products.

Some of our graduates are in senior roles in the pharmacy and healthcare industries, and government, or used pharmacy as a pathway for future study in medicine, or a career in academia or research.

**Professional memberships**

Graduates may be eligible for membership with the following professional body:

- **Pharmaceutical Society of Australia**

**Accreditation body**

- **Australian Pharmacy Council**. Completion of the degree may not result in graduates receiving automatic registration.

Please contact the registration body for details of any conditions for registration.

**Additional costs**

Clinical uniform (may be purchased from the school). Costs for vaccinations and serology are the responsibility of the student and will vary based on individual requirements.

**Your postgraduate options**

Postgraduate coursework options include:

- Postgraduate coursework study:
  - Graduate Certificate, Graduate Diploma and Masters is available in Clinical Pharmacy
  - Master of Pharmaceutical Industry Practice
  - Graduate Certificate in Pharmacy Practice (incorporating the Intern Training Program).

Postgraduate research degrees (MPHil and PhD) are also available in your area of interest.

* UQ is one of the leading universities in the world and the Bachelor of Pharmacy (Honours) lecturers are very knowledgeable, well organised and really nice. The tutorials are very practical and include case studies. During your placement you have the opportunity to apply your knowledge learned in lectures by meeting patients and talking with them about their symptoms, side effects and interactions with their medication.**
Bachelor of Physiotherapy (Honours)

In the Bachelor of Physiotherapy (Honours) you develop diagnostic and treatment skills through hands-on, small group learning and supervised clinical practice to help individuals manage pain and help them participate in daily activities, mobility, fitness and sport.

Why study the Bachelor of Physiotherapy (Honours) at UQ?
Physiotherapists assist people with a range of injuries and ailments, from office workers with stiff necks and sore backs, to elite athletes with injuries, older adults with chronic health issues, children with developmental delays, and people requiring rehabilitation after life-changing events such as a stroke. Whatever the cause of pain or impairment, physiotherapists help people to get moving.

Study the Bachelor of Physiotherapy (Honours) at UQ and you will join a long tradition of international leaders in physiotherapy teaching, research and graduate excellence, at one of the largest physiotherapy teaching, research and training institutions in Australia. You will:
• build a strong knowledge foundation of applied study in medical science, physiotherapy science, anatomy, professional ethics, psychology and therapeutic exercise, from your first year
• prepare for a career caring for people with musculoskeletal, neurological, respiratory and other conditions, using techniques to reduce pain, improve movement and restore muscle control for better mobility and function
• benefit from a diverse range of learning approaches, including lectures, seminars, skill-teaching sessions, practical classes, tutor and peer feedback sessions, supervised clinical practice and assignment work
• study the theory and practice behind physiotherapy, including injury prevention, health promotion, clinical reasoning and diagnosis, therapeutic interventions, movement, retraining, exercise prescription and optimising function to enhance the health of individuals
• participate in an extensive, award winning simulated patient program in the School’s hospital simulation ward and the UQ Physiotherapy Clinics to prepare you for full-time supervised clinical practice
• learn from internationally renowned physiotherapy educators and researchers
• graduate with a highly respected honours qualification, with advanced knowledge and skills that will set you apart in a competitive job market and provide a pathway to future research and learning
• be a leader in your field, gain internationally-recognised qualifications and become a skilled healthcare professional who helps people improve their health and function.

Practicals, placements and internships
You will undertake supervised clinical practice in a range of clinical settings that include hospitals, educational facilities, healthcare organisations, aged and community care, private practice and UQ’s Physiotherapy Clinics.

From Year 1, you will undertake a variety of sessions and supervised experiences before starting full-time block placements during your fourth year. Students may receive the opportunity to undertake a placement outside of the Brisbane metropolitan area. In such cases students fund all or part of their travel, accommodation and living expenses.

Career outcomes
Career opportunities for physiotherapists are extensive and include:
• aged care and community healthcare services
• educational facilities
• private practice, offering treatments to a range of clients or specialising in areas like sports or musculoskeletal physiotherapy, paediatrics, obstetrics and rehabilitation
• public or private hospitals
• rehabilitation units
• research or advisers in educational and government institutions.

Professional memberships
Graduates may be eligible for membership with the following professional body:
• Australian Physiotherapy Association

Accreditation body
Graduates are recognised by the Physiotherapy Board of Australia (PBA) and will be eligible to apply for registration through the Australian Health Practitioner Regulation Agency (AHPRA) to practice physiotherapy within Australia. To obtain further information relating to Registration Standards for Physiotherapy, visit the AHPRA website: ahpra.gov.au

Additional costs
Annual CPR recertification (approx. $60); First Aid Certificate (including CPR) (approx. $55). Costs for vaccinations and serology are the responsibility of the student and will vary based on individual requirements; clinical uniform (may be purchased from the school).

Your postgraduate options
• Master of Physiotherapy – speciality coursework masters in musculoskeletal and sports physiotherapy.

Research higher degrees (MPhil and PhD) in Paediatrics, Obstetrics and Rehabilitation are also available.

Bachelor of Psychological Science (Honours)

Explore the fascinating world of the mind and take the first step towards a professional career as a psychologist with this foundation program focusing on the complete spectrum of developmental, social, cognitive, biological, physiological, and abnormal psychology.

Why study the Bachelor of Psychological Science (Honours) at UQ?

Have you ever wondered about someone else’s mind? Do you ever wonder if listening to angry music just makes people angrier? Have you ever remembered an event at UQ?

The Bachelor of Psychological Science (Honours) teaches you how to understand the ways people behave, think and feel. By studying psychology, you can gain the skills to help people enhance their performance and enjoyment in physical activity, help improve quality of life, and help individuals and teams develop the skills needed to enhance performance and enjoyment in physical activity.

Career outcomes

Psychology prepares you for a range of exciting careers that require superior problem-solving, critical thinking and understanding of human behaviour. You may be interested in working in areas such as human resource management, mental health services, youth work, residential care work, family and social services, public service management, private sector administration and management, market research, disabilities services, juvenile justice and corrective services, advertising, or statistical research.

Your psychology degree will also prepare you for further study leading to a career in areas such as occupational therapy, speech pathology, audiology, public health, counselling, social work, communication, development practice, environmental management, sports coaching or health economics.

Professional careers in psychology include:

- clinical psychology: specialising in the assessment, treatment and prevention of a wide range of emotional and behavioural problems
- organisational psychology: applying knowledge of human behaviour to the enhancement of organisational effectiveness, productivity and individual wellbeing
- sport and exercise psychology: helping individuals and teams develop the skills needed to enhance performance and enjoyment in physical activity
- geropsychology: applying practical knowledge of primary prevention, strategies, clinical intervention and rehabilitation for older people
- health psychology: learning skills in illness prevention and treatment in public health settings
- research/academic psychology: applying skills to the advancement and communication of knowledge relating to psychology
- counselling psychology: helping individuals, families and other groups with issues related to personal wellbeing, interpersonal relationships, work, recreation, health and crisis management
- clinical psychology: specialising in the assessment, treatment and prevention of a wide range of emotional and behavioural problems
- organisational psychology: applying knowledge of human behaviour to the enhancement of organisational effectiveness, productivity and individual wellbeing
- sport and exercise psychology: helping individuals and teams develop the skills needed to enhance performance and enjoyment in physical activity
- geropsychology: applying practical knowledge of primary prevention, strategies, clinical intervention and rehabilitation for older people
- health psychology: learning skills in illness prevention and treatment in public health settings
- research/academic psychology: applying skills to the advancement and communication of knowledge relating to psychology

Professional memberships

Graduates may be eligible for membership with the following professional body:
- Australian Psychological Society.

Accreditation body

Australian Psychological Accreditation Council.

Bachelor of Social Work (Honours)

With its emphasis on simulation and industry-focused placements, the Bachelor of Social Work (Honours) will prepare you for a rewarding career working with people, as well as addressing social and community issues and problems. Social workers play a key role in developing a society based on social justice, and in alleviating disadvantage.

Why study the Bachelor of Social Work (Honours) at UQ?

Social work is an exciting and rewarding career if you are interested in working with people and addressing social and community issues and problems. As a social worker, you will have a commitment to the wellbeing of society and be highly skilled to intervene with and support individuals, families, and communities to achieve equitable access to opportunities and resources. Social workers stimulate action to change the social circumstances of individuals and groups who are socially excluded. They also work to reduce personal pain and distress and provide direction for individual development.

UQ’s Bachelor of Social Work (Honours) is the only four-year honours program in Australia that offers the opportunity to develop a society based on social justice, and in alleviating disadvantage.

Career outcomes

Many social workers practise in a variety of areas including government agencies, child protection, drug and alcohol support clinics, Indigenous health and welfare agencies, residential care, community organisations, private practice, and other organisations, in roles such as:

- advocate or negotiator acting for people facing discrimination or unable to act for themselves
- community worker in local government or community organisations
- planning and management of social and welfare services, helping individuals and families facing personal distress or crisis associated with family and personal relationships
- in hospitals helping patients and their families cope with and adjust to their health conditions, or helping those experiencing the loss of health or employment due to disability
- family therapist.

Some of our more experienced graduates are CEOs of government and non-government organisations, policy officers, community development workers, international aid workers, family therapists, probation officers and juvenile justice workers.

This program is an entry qualification into the social work profession and has been determined to meet the Australian Social Work Education and Accreditation Standards.

Professional memberships

Graduates may be eligible for membership with the following professional body:

- Australian Association of Social Workers.

Accreditation body

- Australian Association of Social Workers.

Some of our more experienced graduates are CEOs of government and non-government organisations, policy officers, community development workers, international aid workers, family therapists, probation officers and juvenile justice workers.

Your postgraduate options

- Master of Counselling

Career outcomes:

- Higher degree by research (MPhil and PhD) in your area of interest are also available.

UQ’s Bachelor of Speech Pathology (Honours) is recognised around Australia and across the world for its award-winning teachers and graduate leaders. Study Speech Pathology at UQ and get hands-on, practical experience in a range of clinical placements in metropolitan, regional and rural areas of Queensland.

Why study the Bachelor of Speech Pathology (Honours) at UQ?

UQ’s Bachelor of Speech Pathology (Honours) will prepare you for a rich and rewarding career as a specialist in language and communication. This program prepares you to help people of all ages with speech, language, fluency, swallowing and voice disorders. This ranges from small children who don’t understand what their parents are telling them, injured adults who need to communicate skills and adults with disabilities as a result of disease or injury.

Practicals and placements

You will complete supervised clinical placements throughout the duration of the program to demonstrate competency for entry into the profession. These clinical placements can include hospitals, educational facilities, healthcare organisations, private practice and UQ’s Speech Pathology Clinic. The clinic is open to the public and helps children and adults with various communication difficulties, including delayed speech development, stuttering, and language difficulties following stroke.

From Year 1, you will undertake a variety of practical experiences. Full-time block placements are also completed during Years 3 and 4. Students may receive the opportunity to undertake a placement outside of the Brisbane metropolitan area, including regional, rural, and international settings. In such cases students fund all or part of their travel, accommodation and living expenses.

Career outcomes

There are many career options in Australia and internationally for our graduates, including work in:
- aged-care facilities
- community health centres
- mental health services
- preschools, schools, kindergartens and childcare settings
- private practice
- public and private hospitals
- rehabilitation units.

A speech pathologist’s day can involve:
- individual patient care
- conducting group therapy sessions
- creating classroom support programs
- home visits for clients and carers
- consultation with rehabilitation and allied health units
- implementation of preventative programs
- development of policy.

Professional memberships

Graduates may be eligible for membership with the following professional body:
- Speech Pathology Australia.

Accreditation body

- Speech Pathology Australia.

Completion of the degree may not result in graduates receiving automatic registration. Please contact the registration body for details of any conditions for registration.

Additional costs

Annual CPR recertification (approx. $60); First Aid Certificate (including CPR) (approx. $155); clinical uniform shirt (approx. $25).

How to study overseas
Studying overseas is an ideal way to enhance your employability while also enjoying the experience of a lifetime. As a UQ student, you can access a range of global experiences: from exchange and short-term study, to international internships, volunteering and opportunities to represent UQ on the global stage. Our Global Experiences team can help guide you through the application process and get you set for international success.

employability.uq.edu.au/global-experiences

Student exchange program
Study overseas in your choice of 38 countries for up to one year, while still gaining credit towards your UQ degree. While you’re on exchange, tuition fees at the host university are waived and you’ll continue to pay fees and be enrolled at UQ. You can even apply for exchange scholarships and may be eligible for an OS-HELP loan to assist with airfares, accommodation, health insurance and living costs.

Universitas 21 student experiences
UQ is a member of Universitas 21 (U21), an international network of leading research-intensive universities that work together to enhance the student experience across the world. Apply to participate in a range of U21 student experiences such as short-term Summer / Winter Schools, global competitions, and student exchange, and build your global network of like-minded peers.

employability.uq.edu.au/u21

Start planning now!
If you’re interested in studying overseas, the Global Experiences team offers information sessions throughout the year, or you can speak to an adviser.

employability.uq.edu.au/global-experiences

Short-term experiences
Want to study or live overseas for only a short time? Short-term global experiences are a great way to discover more of the world, develop valuable contacts and make the most of your semester breaks. Many experiences at approved host universities in Asia, Europe, the USA or Latin America are eligible for credit towards your UQ program.

38 exchange countries
200 exchange partners
$1.2m+ student funding support for overseas opportunities
75+ short-term programs
1000+ students participating in global experiences
Academic

UQ's Academic Scholarship program is designed to reward the achievements of outstanding school leavers and to identify, support and develop tomorrow’s leaders. If you are a high-achieving student and are completing Year 12 in 2019, or you completed Year 12 in 2018 and are on a gap year, apply for UQ's Academic Scholarship Program. Up to 150 scholarships, ranging in value from $6000 to $60,000, are offered each year to students with outstanding academic achievements, or a combination of academic achievements, leadership and/or community service achievements.

scholarships.uq.edu.au

Sporting

If you excel in both your chosen sport and academic studies, you may be eligible for a UQ Sporting Scholarship. Three main scholarships are offered in partnership with UQ Sport.

UQ Sports Achievement Scholarship

Awarded to outstanding new and continuing students who have demonstrated exceptional ability in their chosen sport. Award value: up to $8000 for one year.

The Clem Jones Sporting Scholarship

Awarded to students with academic ability, who have the potential to perform at a high level in their chosen sport. Preference will be given to applicants with demonstrated financial need. Award value: up to $18,000 over three years.

UQ Swimming Scholarship

Established in 2017, this scholarship supports outstanding new students who have demonstrated exceptional ability in swimming, and represent the UQ Swim Club. Award value: up to $4500 for one year, plus high-performance coaching.

Elite athlete support

UQ is endorsed by the Australian Sports Commission as an Elite Athlete Friendly University (EAFU). Dedicated UQ Sport staff, in partnership with UQ, provide academic liaison support to negotiate flexible options for enrolment, assessment and course-related needs.

support.uq.com.au/elite-athletes/student-support/scholarships

Equity

UQ supports equitable access to education. We offer many scholarships for students who might not otherwise be able to attend university.

UQ Link Scholarships

Awarded to applicants who have experienced educational disadvantage due to financial hardship. Award value: up to $9000 over three years. The Aspire Scholarship Schemes provide additional support for UQ Link recipients.

Indigenous Commonwealth Scholarships

Financial support is available to Indigenous students to help with the costs of going to university.

scholarships.uq.edu.au

Other scholarships

UQ has a number of other scholarships for both undergraduate and postgraduate students who provide fee relief or financial assistance, which you can apply for even after you have started at UQ.

Keep an eye out for upcoming scholarships related to your study area. There are also scholarships to help with studying abroad, assistance for regional and rural students, LGBTIQ+ bursaries, and career-specific scholarships.

scholarships.uq.edu.au

Please note: All figures were correct at time of printing but are subject to change. See scholarships.uq.edu.au before applying to avoid disappointment.

Apply for a scholarship

Make your UQ experience more affordable with the support of a scholarship. You may not think you’re eligible for a scholarship, but you might be surprised!

Create Change Regional Australia Scholarship

The Create Change Regional Australia Scholarship is a new scholarship designed to support applicants from Australian rural and regional areas who are interested in studying at UQ.

Fees and costs

Course fees and student contributions

Most undergraduate places for domestic students at UQ are funded partly by the Australian Government (Commonwealth support) and partly by you (student contribution).

If you’re an Australian or New Zealand citizen, or an Australian permanent resident and have a Commonwealth-supported place, you may also qualify for the Higher Education Loan Program (HELP) to defer payment of your student contribution and Student Services Amenities Fee (SSAF). You will need to apply for a tax file number at ato.gov.au, if you don’t already have one, in order to obtain a HECS-HELP or SA-HELP loan.

International students pay full tuition fees. If you have a Commonwealth-supported place, your student contribution amount depends on the fee band level of the courses you choose (see table at above right).

Fees are charged according to the courses you choose, not the program you’re enrolled in, so it’s not possible to publish a fixed fee for a program. Because most students can choose different electives during their program, costs will vary.

However, indicative annual fees are listed with each program on our Future Students website to help you plan your budget. future-students.uq.edu.au/study/find-a-program

Student Services and Amenities Fee

The Student Services and Amenities Fee (SSAF) is a compulsory fee that is used to subsidise, support or fund non-academic services for students, such as support services, advocacy, study skills, career development and employability.

UQ levies the SSAF – which is capped at a maximum of $303 for 2019 – according to whether you’re an internal or external student, and full-time or part-time. The fee is indexed annually.

Weekly cost of living

Fees

Fees for 2020 are expected to be available from August 2019.
Before you enrol, faculty Academic Advisers can help you develop a study plan.
my.uq.edu.au/fee-schedules

It all adds up!

Don’t forget to budget for accommodation, books, study materials and transport.
Insider Guides provides a helpful online Cost of Living Calculator to estimate your weekly, monthly and yearly living costs.
insiderguides.com.au/cost-of-living-calculator

University is a valuable investment in your future. Knowing what it costs will help you manage your money.

Plan your finances

Keeping your costs down

• Investigate the financial support and fee payment options offered by Centrelink.
humanservices.gov.au

• Explore the scholarships on offer (see page 48).

• Enjoy UQ Union’s free and low-cost entertainment and activities, such as Morning Marmalade and Kampus Kitchen.
uqu.com.au

• Get concessions and student discounts at participating retailers and institutions with your UQ student card.
Applying to UQ

Follow the steps to apply to UQ and start on the path to your future.

STEP 1
Choose

Choose your program
• Read your options on pages 8–45.
• Visit future-students.uq.edu.au.
TIP: Check that you meet all academic and other entry requirements and meet any specific program deadlines.
A range of study area guides and other UQ publications can help you choose the right program.
future-students.uq.edu.au/publications-and-forms

STEP 2
Apply

Apply to study
Future students
Apply by visiting qtac.edu.au.
Current students at other universities
Apply by visiting uq.edu.au/apply.
TIP: Before applying, check that your current institution will give you transferable credit.

How to apply via QTAC
Apply for admission to UQ undergraduate programs through the Queensland Tertiary Admissions Centre (QTAC). The QTAC website explains how to apply, and the entry requirements you need.
List up to six program preferences, but you will receive only one offer – for your highest preference that you are eligible for. Place programs in order of preference, placing your dream program first and your back-up options next.

STEP 3
Accept

Accept your offer
1. Log in by clicking 'Applications' and then 'Application Log In' at qtac.edu.au.
2. Select 'Log In' and enter your details.
3. Select the 'Accept' offer option.
4. Accept your offer.
5. Activate your student account.
6. Go to my.uq.edu.au/starting-at-uq and follow the instructions.
7. Get excited about starting at UQ.

STEP 4
Enrol

Enrol in courses
1. Access your program rules, course list and other helpful information by logging in to my.uq.edu.au/starting-at-uq.
2. Choose your courses at my.uq.edu.au/programs-courses.
3. Enrol online at sinet.uq.edu.au.
4. Plan your timetable and sign on to classes.
5. Pay fees (see page 51).

STEP 5
Prepare

Prepare for Week 1
• Complete the steps on the Starting at UQ website, or download the UQ Checklist app to get organised.
my.uq.edu.au/mobile-apps
• Attend a Getting Started session.
• Check if you need to attend any program sessions before Orientation Week.
• Pick up your student ID card after you have enrolled.
• Get answers to any remaining questions before classes start by emailing starting@uq.edu.au.

STEP 6
Let’s go!

Are you an Aboriginal or Torres Strait Islander student?
Our Aboriginal and Torres Strait Islander Studies Unit can help you with:
• understanding your options
• choosing what to study
• applying for scholarships and entry.
atis.uq.edu.au

Get ready for the ultimate university experience
• Prep Week – jump-start your university journey.
• Experience a taste of #uqlife during Orientation Week.
• Connect Week – join the social scene, make new friends and link in with your academic circle.
• Culture Week – experience UQ’s diverse cultural and global networks.
• Success Week – learn about the resources available to help you succeed at UQ.
• Instagram (@uniofqld) or Snapchat (uniofqld) your UQ experience to your friends.
The University’s main campus at St Lucia is set on a magnificent 114-hectare site—we even have our own postcode! Bordered by the Brisbane River, the campus has expansive landscaped grounds, three lakes, an aquatic centre, tennis courts, eight athletics ovals with a 600-seat grandstand, and teaching and learning facilities that are equipped with state-of-the-art technology.

Pharmacy Australia Centre of Excellence (PACE)

Within walking distance of the St Lucia campus and easy access by bus and train, PACE is a purpose-built facility that is home to UQ’s School of Pharmacy. Well equipped with contemporary teaching and research laboratories, mock pharmacy counselling rooms, innovative teaching dispensaries and student interaction spaces, it is the hub for all things pharmaceutical at UQ.

Herston

Located only five kilometres from Brisbane’s centre, Herston is UQ’s core campus for clinical health teaching and research. Located alongside the Royal Brisbane and Women’s Hospital, the campus adds great benefit to our students and staff by being in the heart of a fast-paced clinical academic environment.

Oral Health Centre

The Oral Health Centre based at the Herston campus is the largest and most advanced tertiary oral health facility within Australia. It brings together renowned academics, researchers, leading practitioners and top-tier students who are united by their passion to improve the lives of everyday Australians through improved dental care.
